

# Neuro Endurance Sports Foundation

# ANNUAL REPORT 2020

# Message From Directors

Dear friends,

2020 was quite a year. In late May of this year Neuro Endurance Sports Foundation became an official 501(c) organization. Outdoor in-person activities were cancelled or postponed but the disruption we have faced is nothing compared to those who suffer with Alzheimer's, brain cancer, and Parkinson's disease.

As a Private Foundation, Neuro Endurance Sports Foundation seeks to increase awareness, foster enthusiasm, and support for brain science through community activity and sports virtually as well as in-person. In the Annual Report, you will read about the events and organizations we supported, the impacts we made, and our financial report.

Alzheimer's disease is the sixth-leading cause of death in the United States. More than 6 million Americans live with Alzheimer's. Alzheimer's kills more people than breast cancer and prostate cancer combined.

An estimated 700,000 Americans are living with a primary brain tumor. In the following year, 2021, an estimated 84,170 people will receive a primary brain tumor diagnosis while an estimated 18,600 people will die from a malignant brain tumor. Brain tumors represent the highest per-patient initial cost of care for any cancer group, with an annualized mean net cost of care approaching \$150,000.

Nearly 1 million people in the United States and over 10 million people worldwide are living with Parkinson's disease. Approximately 60,000 Americans are diagnosed with Parkinson's disease each year. Medication's alone cost an average of \$2,500 a year and therapeutic surgery can cost up to \$100,000 per person.

Alzheimer's, brain cancer, and Parkinson's disease are all progressive diseases that take an extreme toll on the individual and caregivers. The physical and mental endurance required during a diagnosis and treatment is extreme. The Neuro Endurance Sports Foundation and the people suffering Alzheimer's, brain cancer, and Parkinson's disease appreciate your generous support and we urge you to continue to bring awareness to these degenerative diseases.
